Colourful wonder

Eleven shades that speak of the product and of the Customer's personality through light, material and texture: glossy, brushed or opaque surfaces, up to the high-strength PVD versions - each finish makes us enjoy anew the wonder of water every day, transforming the space into experiences of style and authenticity.

Cromo polished

Bright and timeless, it enhances lines by stylishly reflecting light and transforming any context into an elegant and refined setting.

Inox brushed

Austere and essential, it brings sober, modern beauty: it harmonises every space with balance - ideal for people who love a rigorous and refined style.

Acciaio brushed

Modern, refined, long-lasting: a hi-tech, hygienic material that enhances any setting with sober elegance and contemporary style.

Grafite brushed PVD

Deep and sophisticated, it combines material intensity and contemporary design, giving spaces a distinctive and modern character.

Mora matt

Soft, velvety and embracing, it interprets design with elegance and dark charm, enriching every architecture with style and refinement.

Neve matt

White and delicate, it illuminates the space with lightness: it gives harmony and serenity to the rooms, enhancing the lines with natural simplicity.

Miele brushed PVD

Warm and bright, it fills the atmosphere with soft and golden hues: it spreads sensuality, bringing elegance and refinement to contemporary spaces.

Ambra brushed PVD

Bold and precious, it reveals luminous shades that evoke a natural charm: sophisticated and modern, it makes the space inviting and full of character.

Caffè brushed

Intense and welcoming, it transforms every setting into an intimate and sophisticated space, enhancing material beauty with uniqueness and character.

Tramonto polished PVD

Intimate and vibrant, it reflects light with scenic vivacity, blending charm and modernity and creating dynamic and engaging spaces.

Tabacco matt

Full and deep, it recalls the strength of the earth: elegant and sensual, it enhances surfaces, adding personality and prestige.

Overview of the collections

Different characters are outlined by the perfect association of shape and shade. Various shades to increase the character of individual collections: through the proposed combinations, we accompany customers to the style solution that best valorises the entire area.

Nobili Institute of Technology: our home

Our home is the truest expression of the vision that drives us. That is why it is constantly transforming - more open, more sustainable, more innovative. A manufacturing hub where technology and corporate progress come together with people's needs. This is the NIT: a place shaped by our sense of wonder.

New perspectives

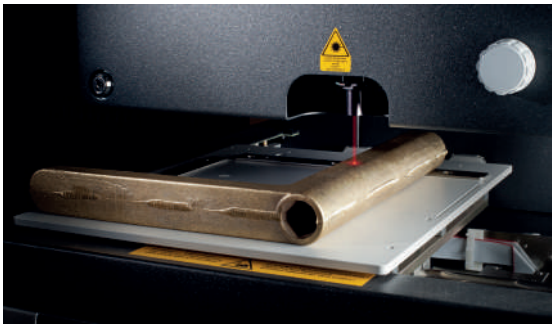

The NIT is expanding to welcome the future. Within “Il Portico”, the new architectural project by Maria Grazia Nobili and Alice Cristina, our idea of total excellence comes to life: a space where design meets advanced technology. With reception areas, immersive showrooms, and state-of-the-art labs, this is more than an architectural extension - it is the vibrant core of our research.

Made in Nobili

Since the first stone of the Suno plant was laid, our objective was the in-house execution of every phase of the tap manufacturing process. This aim has now been successfully achieved. The total control of each production phase has allowed us to raise the quality of our products, acting on every detail and process.

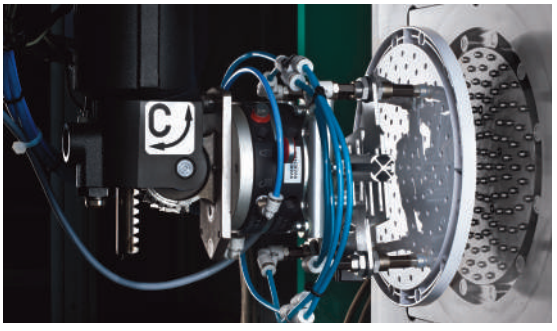

Laboratory: from creativity to prototype

The joint work between the style centre and the laboratory transforms our vision into a wonderful item, a marvel: perfect, sustainable, reliable and certified.

Foundry: from fire to brass

The jewel in the crown of our production, it is the only fully automated plant in the sector and can process 750,000 kg of brass per year.

Plastic moulding: series uniqueness

Our presses work non-stop 24 hours a day: this large-scale production system processes almost 50,000 components per day.

Turning: quantity and precision

Our lathing department has 120 machines than can manufacture over 28 million components per year, starting from a simple brass bar.

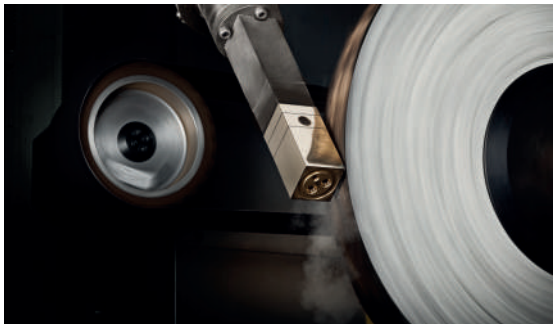

Washing: a clean way to wash

All our components undergo a thorough 30-minute wash cycle to eliminate any oil residues that could compromise subsequent processing steps.

Sanding: we aspire to clean air

We have designed and built 100 closed-circuit robotic machines, which allow us to fully recover excess brass powder.

Polishing: maximum definition

It defines every single product in detail: the micro-removal and micro-melting of the pieces occurs here, using abrasive paste and cotton.

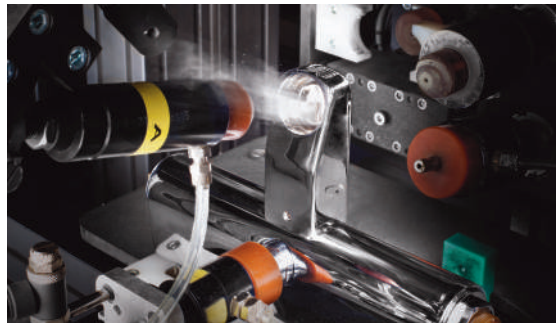

Chrome plating: bright and shiny

30,000 components are processed daily in closed-loop systems that preserve every drop of water - we constantly strive to use this resource responsibly.

Finishes: endless search

Over 1,000 hours a year to select methods that are increasingly environmentally friendly and do not harm people's health.

Assembly and testing: body and soul

This process is executed on semi-automatic lines and work benches: immediately afterwards, every product undergoes quality control testing with air.

Storage and shipping: the human factor

This phase requires great attention and efficiency, both to protect the well-being of workers and to ensure fast and faultless shipping.

Sustainable wonders: product and environment

We define it as "sustainability by design", a virtuous circle in which the production approach cannot be separated from the environmental approach.

International certifications

Every Nobili mixer is designed and manufactured in-house, complying with the strictest international standards and guaranteeing utmost quality, safety and respect for the environment. For more information on which articles have obtained one or more certifications, please visit our official websites or write to *qualita@nobili.it*

Nf

Issued by the CSTB laboratory, leading European French certification, it certifies the conformity of products and services to international standards.

Acs

Developed by the French healthcare authorities, evaluates whether a product in contact with water for human consumption is compliant.

WaterMark Sai Global

For Australia and New Zealand, the WaterMark Sai Global certification envisages tests on the conduction system elements.

Dvgw

For companies that make products in contact with drinking water, to support them in launching their products on the German market.

Sintef

It contributes towards guaranteeing the values and environmental protection via certification schemes based on international standards.

Kiwa

International Quality Authority that supports companies in their growth: the certification is dedicated to some models of mixing cartridges.

Belgaqua

A professional association that groups together the three regional associations representing the water sector in Belgium.

Svgw

The Swiss company SSIGA has contributed to the safe and sustainable supply of gas, heat and drinking water since 1873.

Pzh

Established as a science base, the national public health institute PZH - PIB is the oldest public healthcare institution in Poland.

Csa Group

CSA Group is a global organisation dedicated to improving life by developing consensus-based standards in both the public and private sectors.

Unified Water Label

It identifies products using water by a clear, concise and easy-to-understand label, addressed to water and energy consumption.

Water Supplies Department

It is responsible for providing fresh water and sea water (for flushing) for Hong Kong residents, for both domestic and non-domestic use.

Lifetime Warranty

Our product expresses maximum technological innovation at the service of quality of life and respect for the environment. It speaks of how we use first-class materials processed through state-of-the-art procedures, which is why we are proud to guarantee our Nobili Widd® 2020, Widd® 35 and Widd® 28 cartridges for life.

Brass mixing rod

The cartridge operating lever rod is made of brass, instead of plastic, ensuring greater robustness and durability.

Flow limiter

The insert positioned at the top of the lever rod allows you to reduce your water consumption by slowing down aperture mid-travel.

Temperature limiter

A swivel ring nut allows you to select the maximum temperature delivered by the mixer, decreasing hot water consumption.

Ceramic plates

Inside the cartridge, the pure ceramic plates improve reliability and ensure unrivalled smooth lever operations.

Ultem™ 2200

We use Ultem™ 2200, a plastic polymer loaded with 20% fibreglass for greater rigidity, elasticity and strength.

Flow rate limiter

Available upon request, it allows you to select the maximum mixer flow rate, regardless of the aerator and water inlet pressure.

Nobili Bathroom

Nobili's bathroom-dedicated products represent our brand's state-of-the-art: characterised by a strong stylistic identity, they conceal within them the most cutting-edge technology and the most advanced devices in terms of sustainability. Several lines of accessories complete the design of the architectural space.

Sole

Refined simplicity, new proportions capable of overturning the most traditional logic. Sole represents the perfect synthesis between technology and style, a combination capable of giving life to a unique mixer, which never gets boring thanks to its extreme essentiality: complex to build, simple to live.

Nobili Widd® 2020 cartridge

It revolutionises the structure of mixers, doing away with the side cartridge block and giving rise to an extremely clean-cut and streamlined silhouette.

Cold water turn-on

The tap is turned on with cold water to avoid the involuntary start-up of the boiler and the release of carbon dioxide into the atmosphere.

Neoperl® aerator with 5 l/min flow rate

Sole is fitted with an aerator Neoperl® with a flow rate reduced to 5 litres per minute: it ensures a healthy flow while at the same time saving water.

Comprehensive range

The Sole range covers all areas of the bathroom: sink, bathtub and shower area, including various components with dedicated designs.

Available finishes

In addition to the Cromo and Inox brushed finishes, the Sole range is available in three other shades: Grafite brushed PVD, Caffè brushed, Tabacco matt.

Matching accessories

Available in all the finishes of Sole, Zen accessories keep your bathroom neat and tidy, giving rise to modern atmospheres oozing style.

Velis

Pure minimalism, pure technology, pure freedom. Velis eliminates the superfluous and returns to the essential, through a modern and timeless line: the Nobili Widd® full immersion cartridge (in its most recent version with axial mixing) allows an unprecedented and extraordinary balance between style and progress.

Nobili Widd® 2020 cartridge

It revolutionises the structure of mixers, doing away with the side cartridge block and giving rise to an extremely clean-cut and streamlined silhouette.

Cold water turn-on

The tap is turned on with cold water to avoid the involuntary start-up of the boiler and the release of carbon dioxide into the atmosphere.

Neoperl® aerator with 5 l/min flow rate

Velis is fitted with an aerator Neoperl® with a flow rate reduced to 5 litres per minute: it ensures a healthy flow while at the same time saving water.

Dual personality

The wide Velis range is available with two outlet spout variants, both available in all the finishes of the collection.

Available finishes

Some of the various finishes available for Velis: Grafite and Miele brushed PVD (scratch and wear resistant surface) and Tabacco matt.

Matching accessories

Available in all the finishes of Velis, Zen accessories keep your bathroom neat and tidy, giving rise to modern atmospheres oozing style.

Respiro

Respiro was born from the desire of Nobili and Jese Medina-Suarez to create a series inspired by the world of “wellness”, which could remain immersed in contemporary life and withstand the challenges of time: its versatility allows it to successfully adapt to different aesthetics and budgets, from high-end luxury to the upper-middle range.

Cartridge with lifetime warranty

The Nobili Widd® immersion cartridge affords unthinkable levels of reliability: torsional strength 18 Nm, high pressure resistance above 70 Bar.

Sinuous opening

The knob creates a sinuous movement by sliding on the reducer: a refined detail such as the mixing rod, a true distinctive element of the collection.

Neoperl® Cascade® Slc® aerator

Because it has a soft surface, you can easily remove limescale by simply moving your finger over the surface, without disassembling it from its seat.

Timeless and refined

The alternation of decorated and totally smooth surfaces creates a remarkably elegant overall balance, suitable for withstanding the passage of time.

Available finishes

In addition to the Cromo polished and Inox brushed finishes, Respiro is available in Grafite brushed PVD, Miele brushed PVD and Tabacco matt shades.

Dedicated accessories

Respiro accessories are designed to extend the iconic style and contemporary elegance of the series in the bathroom.

Sole

Centro Stile

Disruptive lines, inspired by the archetype of the tube and the world of industrial hydraulic closures, an original synthesis of design and technological innovation: in Sole, axial mixing in its most advanced form allows the control knob to be positioned at the end of the spout. A project made possible by the most innovative cartridge ever, Nobili Widd® 2020, capable of cleaning the mixer lines and improving its efficiency.

Velis

Centro Stile

Velis eradicates all excess surplus and goes back to understated basics, thanks to a modern and timeless line. The Nobili Widd® immersion cartridge in its most recent version with axial mixing strikes an unprecedented and extraordinary balance between style and cutting-edge innovation: it does away with the side cartridge block and gives rise to an extremely clean-cut and streamlined silhouette.

Respiro

Jese Medina-Suarez

There are places in the world that can make us feel good. Spaces showing their essence through a gentle harmony of environments, furnishings and objects. A delicate balance between diversity and discretion, where art knows how to be bold without appearing intrusive. A tap embracing this language, silent but powerful, does not limit itself to simply filling a space: it breathes with it, making it not only an environment to be admired, but a place with a soul, an experience to live deeply.

Acquerelli

Centro Stile

The dynamic freshness of Acquerelli enthusiastically accompanies the unforgettable sensations of the first home: a magical moment of our life. The light-heartedness of youth, the irrepressible joy, the vivacity of colors: an intimate and special refuge, a place that speaks about us, reflects our tastes and our personality.

Yoyo

Centro Stile

Essential harmony and contemporary simplicity: the Yoyo collection expresses character and personality through a soft and sinuous line, made possible by the Nobili Widd® immersion cartridge (with a diameter of just 28 millimetres) and emphasised by the concealed aerator, which defines its features and enhances its elegance.

Nobili taps

Lira

Piet Billekens

With a simple contour that is noble in conception, the shape of water starts its journey from a line - an essential and minimalist trait that opens to a polyhedric world of interpretation. Lira overcomes the concept of fashion, crystallising timelessness in its style - character is in the eye of the beholder.

Carlos Primero

Piet Billekens

Carlos Primero reflects a generational transition from retro styles to innovative solutions. A complete range of products for refined, distinguished atmospheres - such as mixers for washbasins, bidets, baths and showers, as well as a rich offering of matching accessories - catches the eye with its sensual elegance.

Grazia

Centro Stile

Pattern of contrasts in vintage style. Sensations of pleasant tranquillity. Peace and well-being from a distant past: the Grazia collection brings back the charm and appeal of ancient times, mixing a marked 20th century style with the most modern technological innovation of our brand.

Respiro

Jese Medina-Suarez

The exclusive range of Respiro accessories allows you to extend the sensorial touch of taps (characterised by the textured surface and the iconic intersection element, a meeting point between functionality and style) even outside the washbasin top: different models (towel holder, hanger, roll holder) ideal for completing the bathroom furnishings by combining elegance and refinement in a balanced mix of modernity and versatility.

Today

Piet Billekens

Like the taps they are inspired by, the Today accessories dedicated to the Acquaviva collection stand out because of the soft, rounded form of the edges. Any item chosen from the broad range of products can blend perfectly into the bathroom setting.

Neoclassic

Centro Stile

The Neoclassic ceramic accessories for the bathroom accompany the sinuous shapes of the Sofì and Carlos Primero tap collections, accentuating their style and enhancing their details. The combination of the various materials creates a formal balance that can give life to a room where nothing is left to chance.

Enne di Nobili Bathroom

Enne di Nobili bathroom products are strongly focused on water and energy efficiency. The Nobili Widd® cartridge, designed and manufactured in-house and covered by a lifetime warranty, is a pioneering and tangible assurance of our brand's reliability.

Abc

Abc, like all the other Enne di Nobili collections, promotes a zero environmental impact philosophy through maximum water and energy savings: the 5 l/min aerator is combined with cold water flowing when the tap is turned on, which means the boiler does not activate and no combustion fumes are released into the atmosphere.

Cartridge with lifetime warranty

The Nobili Widd® immersion cartridge affords unthinkable levels of reliability: torsional strength 18 Nm, high pressure resistance above 70 Bar.

Cold water turn-on

The tap is turned on with cold water delivery, which translates to zero carbon dioxide emissions derived from the involuntary start-up of the boiler.

Neoperl® aerator with 5 l/min flow rate

The Neoperl® Cascade® aerator with a flow rate reduced to 5 litres per minute, the simplest and fastest way to help save the Planet.

Snap washbasin drain

Truly high-performance, it creates an anti-unscrewing lock, it can be adjusted without the use of tools, it is tamper-proof and anti-tilt.

Npi Italia Parinox® Softpex® hoses

Approved all over the world, thanks to its internal hygiene properties, its optimum resistance to temperature and pressure and its improved flexibility.

Guide ring

A guide ring guarantees perfect alignment of the tap into the hole in the ceramic, simplifying and speeding up assembly.

Enne di Nobili taps

Blues

Centro Stile

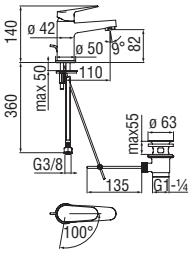

Extrovert geometrical patterns and a brilliant heart go hand in hand. A meeting of pure and expressive lines to celebrate the best ergonomics, a bold synthesis of the water element, through a strongly expressive gesture: the Nobili Widd® total immersion cartridge is a guarantee of absolute reliability and maximum environmental sustainability.

Flush-fit bodies

All the universal flush-fit bodies are intended for the installation of washbasin or shower systems, with single-lever or thermostatic mixing. To facilitate and speed up the choice, here is a list of compatible external parts for each one, which the end user can select and install even at a later date.

Easybox

The Easybox 2-way universal flush-fit body is equipped with a 35 millimetre diameter Nobili Widd® cartridge with a lifetime guarantee. It is suitable for masonry walls; because it has built-in slots, it can also be used on plasterboard walls. It is compatible with the EN 1717-compliant anti-back flow device, available as an option.

Cartridge with lifetime warranty

The Nobili Widd® immersion cartridge affords unthinkable levels of reliability: torsional strength 18 Nm, high pressure resistance above 70 Bar.

Protective plastic cover

A removable plastic cover protects the internal mechanical parts; the box's main operating indications are shown on it.

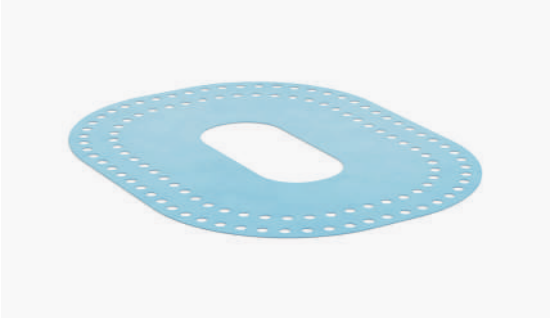

Multifunction box

Designed to provide a perfect seal, it has slots for possible mounting on plasterboard walls. In the event of an assembly error, it can be easily cut out.

Anti-back flow device

Available as an option, the Easybox 2-way universal flush fit body allows you to install the EN 1717-compliant anti-back flow device.

Seal

A three-layer waterproofing membrane, to be positioned between the adhesive and the tile, increases the technical performance levels.

Freedom of choice

Total freedom of choice, both in terms of design and the aesthetic finish, even once the installation is complete.

Wellbox

The Wellbox flush fit thermostatic mixer is synonymous with cutting-edge technology: the safety cut-out prevents the risk of burns in the event of cold water suddenly running out. The mixer can be installed on plasterboard, either vertically or horizontally, and can be connected to the water pipes on the left side or on the right.

Nobili thermotech® cartridge

It increases the water mixing speed and drastically reduces the response time to sudden changes in temperature.

Protective caps with bubble level

They protect the internal mechanical parts, while the integrated bubble level allows for quick and precise installation of the flush-fit body.

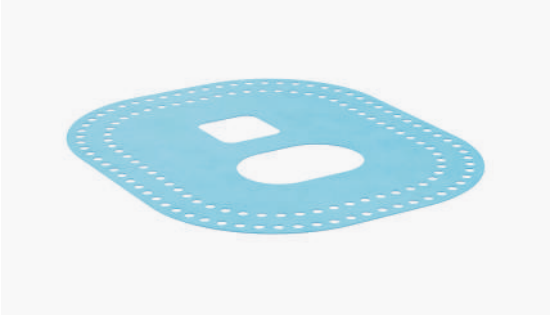

Multifunction box

Designed to provide a perfect seal, it has slots for possible mounting on plasterboard walls. In the event of an assembly error, it can be easily cut out.

Integrated stop taps

Two stop valves fitted with filters allow routine maintenance of the product to be carried out without having to turn off the bathroom mains tap.

Seal

A three-layer waterproofing membrane, to be positioned between the adhesive and the tile, increases the technical performance levels.

Freedom of choice

Total freedom of choice, both in terms of design and the aesthetic finish, even once the installation is complete.

Single control washbasin

Allbox axial

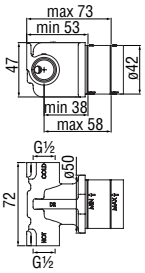

Centro Stile

The universal built-in body for wall-mounted single-lever axial washbasin is compatible with mixers equipped with the revolutionary Nobili Widd® 2020 total immersion cartridge and axial movement: a technological jewel that defines an epochal change in the design of designer taps, allowing entry , the regulation of flow rate and temperature and the water outlet on the same axis, giving life to mixers characterized by essential lines and extreme stylistic minimalism.

Single control shower

Easybox 2ways

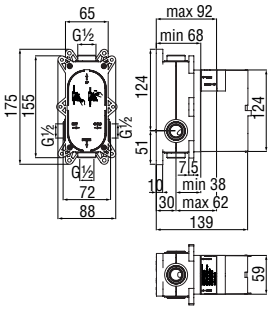

Centro Stile

The Easybox 2-way universal flush-fit body is equipped with a 35 millimetre diameter Nobili Widd® cartridge with a lifetime guarantee. It is suitable for masonry walls; because it has built-in slots, it can also be used on plasterboard walls. It is compatible with the EN 1717-compliant anti-back flow device, available as an option.

Flush fit part

Easybox 2 ways, required flush-fit part
· ø 1/2" water inlet and outlet
· Also suitable for assembly on plasterboard

Note: RVREN1717 backflow prevention device available (optional)

Thermostatic shower

Wellbox 2ways

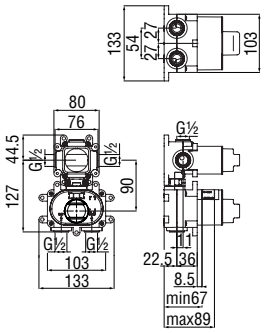

Centro Stile

Rational space design for the 2 ways flush-fit thermostatic mixer Wellbox, ideal for creating a room with wall rod and shower head (or shower set). The 38° safety block prevents any burn risks in the event cold water suddenly runs out while the potential flush fit body assembly on plasterboard, vertical or horizontal as well as the left or right piping connection significantly expands the range of use.

Thermostatic shower

Wellbox Air 2ways

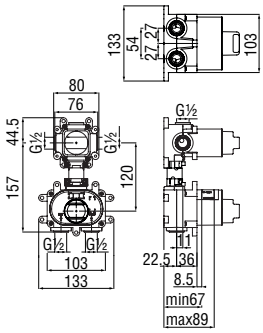

Centro Stile

Essential elegance and total comfort: Wellbox Air 2-way is the ideal solution for managing shower heads and shower sets (or wall rods); the Nobili thermostatic core, which ensures constant comfort and maximum safety with the 38°C temperature lock, combines with the configurations of the aesthetic parts with separate rosettes, perfect for environments with a modern and minimal design. It can be installed on plasterboard (both vertical and horizontal) and allows the connection of pipes to the left or right, ensuring versatility of use that simplifies design and installation.

Shower components

The highest form of well-being meets solutions that are open to any requirement: the wide variety of aesthetic and functional choices makes it possible to create an infinite number of shower system solutions, simply choosing from the totality of dedicated articles and indulging individual tastes and preferences.

Wide range of shower heads

The variety of available shower heads allows you to find the right model for any project, as there are numerous shapes and finishes to choose from.

Home wellness

The most intimate and intense well-being comes from careful design and perfect production: with body jets, showering becomes a sublime experience.

Hand showers for all tastes

Modern and essential lines or classic and timeless echoes, available with different surface finishes and different jet types.

Wall rails with adjustable connection

Some models have an adjustable connection: it simplifies the room's renovation as there is no need to create other fixing holes.

Shower hoses

Different types of hose are available (brass or smooth plastic with a metallic effect), with different lengths (from 100 to 150 centimetres).

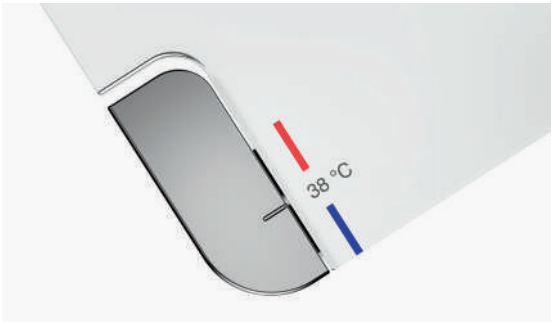

Available finishes

The wide range of surface finishes matches the tones of the bathroom collections, for a truly elegantly furnished shower area.

Plain

A styling choice dedicated to the purest well-being experience: the large glass shelf truly steals the show, keeping your shower space neat and tidy as well as stylish. The total adherence to the wall emphasises the impeccable attention to detail hidden behind an utterly sophisticated design.

Functional simplicity

The generously sized shelf (300 x 130 mm) keeps your bathroom essentials within easy reach, while keeping your shower tidy.

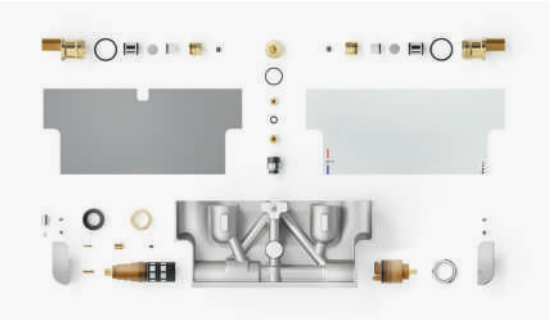

Reflections of style

The scratch-resistant tempered glass pane accentuates the interplay of reflections on the chrome surface: it is available in black or white.

Thermostatic efficiency

The left-hand knob conceals the safety button on the the Nobili Thermotech® thermostatic cartridge with water temperature lock at 38 °C.

State-of-the-art construction

The main body is machined from a solid bar at the NIT, the most sophisticated and efficient production complex in the entire industry.

Full range

The XL shower head (400 x 270 mm) on the Plain shower column echoes the stylistic features of the mixer while ensuring immediate comfort.

Superior comfort levels

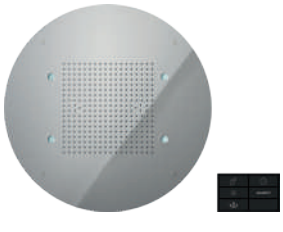

The large 3-jet hand shower (120 millimetres in diameter) has a pushbutton control integrated into the top of the handle grip.

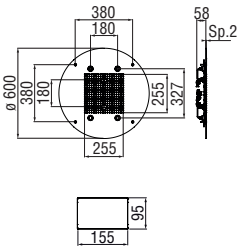

Shower components

Centro Stile

The highest form of well-being meets solutions that are open to any requirement: the wide variety of aesthetic and functional choices makes it possible to create an infinite number of shower system solutions, simply choosing from the totality of dedicated articles and indulging individual tastes and preferences.

Shower

External single control mixer

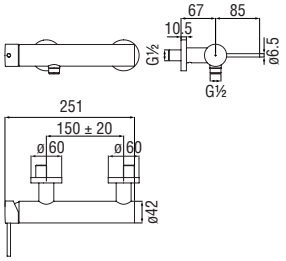

Centro Stile

All the external single-control mixers, dedicated to the creation of simple but functional shower spaces: the design and position of the control lever may vary (on the left or in the centre of the mixer body), but all mixers are equally reliable, as they have the Nobili Widd® cartridge with its lifetime guarantee, which perfectly combines well-being with peace of mind.

Thice columns

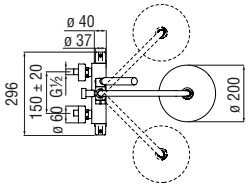

Centro Stile

Particularly suitable when there are children around, the Thice thermostatic mixer, with frozen body technology, can isolate the external surface of the mixer so that it is always cool, even if the water temperature rises. This is achieved through an inner core of plastic material with ultra-high efficiency.

External thermostatic mixer with cold body and telescopic rail

Thermostatic columns

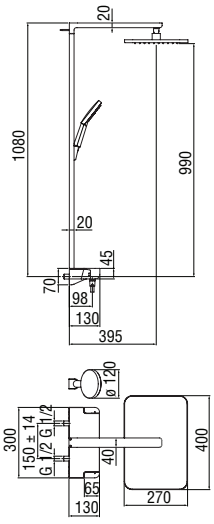

Centro Stile

Energy, relaxation and comfort of use: the range of thermostatic shower columns, fitted with the Nobili Thermotech® cartridge (made using high performance technopolymers which guarantee resistance to high temperatures), can set new quality standards by increasing the speed of water mixing and significantly reducing the response time to sudden temperature changes.

Renova columns

Centro Stile

Dedicated to the renovation of shower areas with no brickwork operations, the Renova columns are suitable for the quick and easy replacement of single jets (riser rail or shower head) with a two-way system. The incorporated deviator provides a choice of fixed or manual shower head, while the telescopic rail makes it adaptable to any setting.

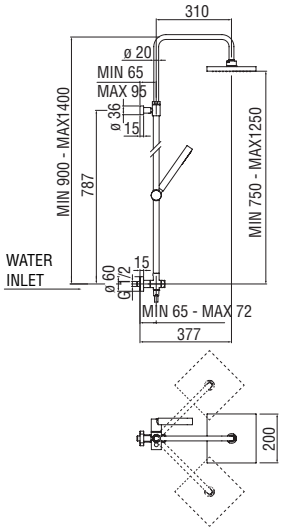

Column with water connection and telescopic rail

Sorgente

Transform your tap water! Depending on the model, Nobili Sorgente systems (Filtra, Bolle, Frizza, and Frizza & Bolle) allow you to instantly have mixed tap water, boiling water at 99 °C, and three types of filtered water: room temperature, chilled, chilled sparkling.

Sorgente Bolle

The boiler is paired with the Gioia filter: it improves water quality by maintaining a proper mineral balance and reduces the presence of heavy metals.

Instant boiling water

Mixed tap water and instant boiling water at 99 °C, saving time in all kitchen activities that require water at this temperature.

Sorgente Frizza

The under-sink device combines everything necessary while maintaining compact dimensions and allowing for free space inside the cabinet.

The water you have always wanted

A single mixer capable of providing concrete help: mixed tap water and three types of filtered water: room temperature, chilled, chilled sparkling.

Sorgente Frizza & Bolle

The secret to such high-performing mixer lies within a single device with compact dimensions and top-notch performance.

I'm your sous chef!

Mixed tap water, boiling water at 99 °C, and three types of filtered water: room temperature, chilled, and chilled sparkling.

Levante

The intuitive spirit of Levante suggests its comfort and convenience. The hand shower's vast range of action, located in the opposite position to conventional mixers, and the ease with which it can be picked up with one hand thanks to its magnetic anchorage, permit total freedom of movement on the sink surface.

Cartridge with lifetime warranty

The Nobili Widd® immersion cartridge affords unthinkable levels of reliability: torsional strength 18 Nm, high pressure resistance above 70 Bar.

Cold water turn-on

The tap is turned on with cold water to avoid the involuntary start-up of the boiler and the release of carbon dioxide into the atmosphere.

Front rotation

The unprecedented front position of the adjustable hand shower pivot centre doubles the radius of action of the mixer.

Magnetic clip

The two-jet swivel hand shower is positioned and held in place by a powerful magnet, allowing you to take it and use it with just one hand.

Ergonomic knob

The knob on Levante mirrors the style of the body of the sink: the elongated shape improves ergonomics and ensures the movements are light and smooth.

Exclusive pad printing

Impeccable and exclusive details: the knob is embellished with the logo of the mixer and the newly designed hot and cold water indications.

Sorgente

Filtra

Centro Stile

Sorgente Filtra turns water from the water mains into purified water with a fresh, natural flavour, removing any taste-altering substances such as chlorine and heavy metals (copper, lead or nickel). The water is supplemented with Magnesium and Zinc thanks to the filter developed in partnership with BWT, a world leader in the water treatment technology industry.

Sorgente

Bolle

Centro Stile

Sorgente Bolle dispenses mixed running water and instant boiling water at 99°C, saving time in all kitchen tasks that require water at this temperature. The high-efficiency water heater is combined with the Gioia filter: it improves the water quality while maintaining the proper mineral balance and reducing the possible presence of heavy metals that are highly harmful to the organism.

Ambra brushed PVD

Mechanical dual-lever with 4 litre pressurised water heater system

- 50% two step cartridge for water saving
- 180° swivel spout (adaptable 120 ° or 360 °)
- Anti limescale aerator M 22 x 1
- ø 3/8" stainless steel flexible pipe
- "Child-lock" patented safety system
- "Cold Body" patented technology
- Separate dispensing channels for boiling filtered water
- EC certified 316 L stainless steel undercounter 4-litre electronic water heater
- Dispenses instant boiling water at 99 °C (up to 2.6 litres > 99 °C)
- GIOIA 5-stage filter (maximum duration 1 year or average capacity of 1,700 litres at 18 °f @ bypass level 6)
- Maximum power rating 1650 W
- Voltage 230 V (50 Hz)
- EU Schuko power supply
- 150 cm power supply cable
- Max noise level 15 dB

N.B.: variant with UK plug available with another product code
N.B.: product not intended for the French market

Electronic dual-lever with chilling-carbonating system

- 50% two step cartridge for water saving
- 180° swivel spout (adaptable 120 ° or 360 °)
- Dual Flow aerator M 22 x 1
- ø 3/8" stainless steel flexible pipe
- Colour LEDs to select the type of water to dispense (room temperature filtered water, chilled water, carbonated chilled water)
- Separate dispensing channels for filtered water and carbonated filtered water
- EC certified electronic chilling-carbonating device
- Chilled water temperature can be selected between 4°C and 10°C using the Nobili Sorgente app
- Customisable degree of carbonation
- Dispenses up to 1.7 litres below 10°C
- Chills by 10 °C up to 2.2 litres of water in 8 minutes (approximately 16.5 l/hour, inlet water temperature 15 °C)
- GIOIA 5-stage filter with RFID* technology (maximum duration 1 year or average capacity of 1,700 litres at 18 °f @ bypass level 6)
- CO2 cylinder included in the set (compatible with all cylinders with Sodastream TP21x4 compatible coupling)
- WiFi connectivity with the Nobili Sorgente App on Android and Apple (available from Google Play Store and Apple Store respectively)
- Maximum power rating 230 W
- Voltage 230 V (50 Hz)
- EU Schuko power supply

*Single compatible filter available for purchase from Nobili or distributors

N.B.: minimum installation requirements L 30 x D 55 x H 49 cm (subject to proper cabinet ventilation)

Cromo polished and Fenix NTM®

An impeccable and mesmerising chrome finish, which complies with the most stringent environmental regulations. The gleaming and polished surface of the mixer poses a stark contrast with the absolute opacity of the Fenix NTM® coating.

Kitchen

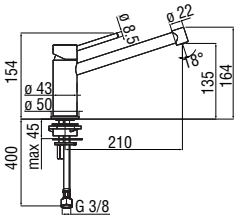

Enne di Nobili

Centro Stile

The Enne di Nobili kitchen range stands out for its simple and sincere shapes: they constitute the ideal choice for everyday life, eliminating everything that is not strictly necessary and devoting themselves entirely to the concreteness solely of functional needs on the sink surface, where ergonomics and reliability play a primary role.

Infrared taps

The infrared range is available with fixed or adjustable water temperature: the infrared sensor avoids contact with the mixer and makes hand washing more hygienic. When hands are placed near it, the mixer automatically releases water: as soon as it no longer detects any movement, the flow stops completely autonomously.

Infrared sensor

Activating flow delivery is simple and hygienic: simply approach the sensor on the body with your hands, without coming into contact with the tap.

Solenoid valves

A small box under the sink surface contains the lithium battery pack and the solenoid valves intended for opening and closing water delivery.

Neoperl® Cascade® Slc® aerator

The Neoperl® Cascade® Slc® aerator allows you to remove limescale deposits simply by passing your finger over the surface.

Self-sanification

To prevent the formation of bacteria, after a 24-hour period of non-use the flow is delivered for approximately 30", ensuring the mixer self-sanitizes.

Cold water or mixed flow

Each infrared model is available in the double version: cold water tap, or with a small lever for temperature control.

Variety of shapes and finishes

The range of infrared taps is available in different types of models and shapes, ideal for every single architectural need.

Various items

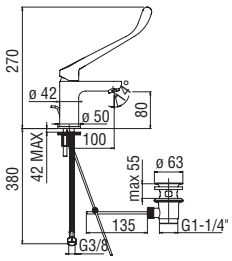

Sanitary fittings

Centro Stile

The utmost ergonomics for the collections dedicated to the community and people with reduce mobility, where reliability and technology play a fundamental role in guaranteeing peerless simplicity and practicality. A complete range the meets the bathroom and kitchen needs, implemented by infra-red proposal, especially indicated for public areas.

Grids for floor

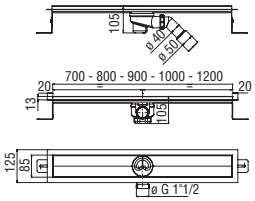

Centro Stile

An innovative solution for the shower setting, with drain channels to satisfy the needs of the modern bathroom: two syphon versions (85 and 105 mm), six styles (five grids with different patterns plus one tileable), five available sizes (70, 80, 90, 100, 120 cm) in addition to the option of a modular installation by creating a continuous line of single units.

Aerators

Centro Stile

The aerators supplied with our mixers accompanied by an image and a description of their most important features, such as the ability to be cleaned with a simple swipe of the finger, or the flow rate reduced to 5 litres per minute, capable of maintaining an aerated flow while at the same time generating significant water savings, reducing operating expenses and helping to protect the environment.

Aerator Neoperl® Cascade® SLC®
· M 22 x 1
· Flow rate 5 l/min
· Limescale-proof protection
· Soft elastomer surface
· Simply wipe off limescale with a finger

General Terms of Sale

We have always believed in trading relations in which every negotiation is based on values such as trust, honesty and reliability, just as we believe in qualified and professional working methods. In order to easily retrive all the information needed to complete the order, the General Terms of Sale are included below in full detail and divided by specific topic.

These General Terms of Sale (hereinafter «GTS») of the company Carlo Nobili Spa Rubinetterie (hereinafter «Nobili») apply to any order made to Nobili by a professional buyer (hereinafter «the buyer») for all the deliveries made to all the countries Nobili exports to. Any order for products or provision of services implies, as an essential and decisive condition, the acceptance by the Buyer, without reservation, of these GTS, which are the basis for the sales negotiations, in compliance with the provisions of the articles of the Code of commerce in force in the various countries, and the related waiver by the Buyer of any other contrary condition, of all the general or special conditions of the Buyer, including any purchase conditions and the purchase orders, the reference contracts and the sales operating contracts, each time these conditions and/or contracts have not received Nobili's prior written consent. The sales negotiations between Nobili and the Buyer must be carried out with mutual respect for the interests of the Parties, fairly and in good faith, as well as in compliance with the articles of the Code of commerce in force in the countries Nobili exports to. In case the latter provide for the submission or attempted submission to obligations that generate a significant unbalance in the rights and obligations of the Parties, Nobili may not in any case grant sales advantages or special sales conditions that are not subject to an equivalent and balanced counter-entry by the Buyer. These GTS may be amended at any time, notwithstanding the fact that any possible amendment will be notified to the Buyer and will take effect from one (1) month from receiving the notification.

Prices

The prices stated in this Price list are approximate and intended for wholesalers. They are intended net of taxes and are expressed in Euro ex-works. This Price list cancels and replaces all the previous editions, notwithstanding errors and omissions. The Price list represents the most up-to-date reference tool. Any errors in this Retail price list do not provide grounds for complaint. Any order made implies the acceptance of all the sales conditions reported below. Nobili reserves the right to increase the prices at any time, in particular in case of an increase in production costs linked to an increase in the price of raw materials. The new price lists will be sent to the Buyer upon request. In this case, the new price lists will be sent to the Buyer two (2) months prior to their enforcement. Orders below 100.00 € net of taxes will be associated to the corresponding order processing costs (which include the entry, preparation and shipping of the order) equal to 30.00 €. Additional costs deriving from shipping via express delivery are on the Buyer's account.

Products

1. The products subject to these GTS are defined with reference to Nobili catalogues. However, the latter may not constitute contractual documents under any circumstance. All the information reported in the catalogues, brochures and price lists is approximate only and commit Nobili only following its written confirmation.

2. Products are manufactured with the highest precision possible, notwithstanding the tolerances used in the sector in question. Nobili reserves the right to unilaterally modify the features of the products sold, based on improvements recommended by its services, and with no obligation to modify previously delivered products (or in pending orders), and without the prints, descriptions and information reported for advertising purposes on Nobili commercial documents being disputed against Nobili.

Orders

Orders are subject to acceptance by the company and are understood to be subject to the established conditions of sale. Orders are intended as accepted at the prices and conditions in force on the date of the order, with acceptance subject to Nobili's approval. Orders and amendments to orders communicated verbally and by telephone must be confirmed by the customer in via post, fax or e-mail. Any cancellations may be authorised only with the prior written approval of Nobili, which reserves the right to apply any relevant penalties or reserves the right to refuse them. Nobili does not accept orders below 100.00 € net of discounts. For lower amounts, Nobili will invoice transport costs for 25.00 € for the standard service and 40.00 € for the 24 hour delivery Express Saver service. The customer must confirm in writing whether it wishes to use this special service. An additional amount of 30.00 € will be invoiced for management costs. Nobili reserves the right to ask the Buyer for full payment upon making the order. The order will be considered certain and definitive only after the collection of the invoiced price by Nobili. Finally, Nobili reserves the right to request, also during the execution of the commitments of the Buyer, any refusal that authorises the cancellation of all or part of the orders made.

Deliveries / Transport / Transfer of risks

1. Unless otherwise specified, the delivery will be made to the address specified by the Buyer at the time of the order. Regardless of the product shipping method, and deviating from the clause of retention of title established in the GTS below, the risks and hazards are transferred to the Buyer when the goods are handed over to the first courier. If the shipping is delayed due to the behaviour of the Buyer or due to a cause outside Nobili's control, the transfer of the risks will take place at the time of the communication by the Buyer of a product supply notification.

2. The delivery delays mentioned in the order confirmation are stated exclusively by way of example, depending on the availability of the products and the transport, unless it is expressly mentioned that these delays are to be considered mandatory.

3. The delivery terms possibly accepted by Nobili are suspended in their own right following any event that is out of Nobili's control and causes a delay in the delivery, and in particular in cases of force majeure. Force majeure refers to any event that is beyond Nobili's will or the will of one of its suppliers, unpredictable and unstoppable, of any kind, natural disasters, epidemics, bad weather, sabotage, embargoes, strikes, accidents, interruption or delay in the transport and supply of raw materials, energy or components, incidents affecting the machine tools, making the contract impossible to be executed whether temporarily or definitively. The list of the cases of force majeure is not limiting. Nobili will inform the Buyer in case an event of force majeure occurs. In this case, the stated delivery terms will be automatically extended proportionally. If, despite the efforts made, Nobili found it impossible to deliver the ordered goods due to force majeure, Nobili will be exempted from its delivery obligation.

4. Under no circumstance can delays in the delivery be subject to Nobili's responsibility. Therefore, delivery delays may not give rise to penalties, compensation, order cancellation, delivery refusal, suspended invoice payment, unless otherwise agreed by Nobili before hand. This is despite the existence of clauses to the contrary in the purchase conditions of the Buyer. In any event, only the prejudice actually suffered by the Buyer, as demonstrated and assessed, may be subject to claim for compensation, which may in any case be submitted only subject to negotiation with Nobili and agreement between the parties. If no agreement can be found, the prejudice will be estimated by an expert entrusted by the Novara commercial court upon the request of the most diligent party.

5. Nobili is authorised to proceed to partial deliveries and billing, before the set delivery term expires and according to reasonable proportions.

6. Should the delivery be delayed on the Buyer's request, the warehousing expenses and the current interest on the capital invested to allow the warehousing will be billed by Nobili for a minimum amount of 1% for each month of delay, calculated on the amount of the invoice, taxes excluded. Upon the expiry of the later term agreed between the Parties, Nobili reserves any right on the products and the right to guarantee the delivery of other equivalent products by a suitable extended term. Any change to an order that is made while the order is being executed, even if accepted by Nobili, implies an extension of the set delivery term according to the methods communicated by Nobili to the Buyer.

7. The Buyer must verify the products at the time of receiving them and immediately express any reservation according to the conditions established under these GTS. Any complaint will be taken into consideration only if the goods are still in the same status they were in when delivered.

8. For items not in stock with a special finish, the estimated delivery time is eight weeks ex-works.

Exclusion of penalties

Since the penalties are meant at remedying a prejudice resulting from the violation of a contractual obligation, Nobili refuses the systematic and arbitrary invoicing of penalties predetermined by the Buyer that, by their very own nature, are not proportional to the prejudice that may have been suffered by the latter, and this despite all the clauses and provisions to the contrary that may be stated in purchasing conditions, annual economic-financial plans, reference contracts, logistic conditions, etc. by the Buyer. As a consequence, no penalty of any nature may be invoiced or deducted by the Buyer from a balance of products without Nobili having been able to verify that the violation and the prejudice claimed by the Buyer exist, by virtue of the articles of the Codes of commerce in force in the various countries Nobili exports to and without Nobili having given its own prior written relevant consent. To this end, the Buyer shall provide Nobili with all the documents aimed at allowing a comparative analysis of the violation claimed and stating the prejudice actually suffered. Nobili will have sufficient time to analyse the documents sent and inform the Buyer with regard to its agreement or disagreement with the violation claimed and the extent of the compensation demanded. Any direct charge by the Buyer that

violates these provisions will be assimilated to a payment incident that will authorise Nobili to refuse any new product order and suspend any delivery under way after having notified the Buyer, or suspend the balance of rebates and other financial advantages, up to closing the Buyer's account. Nobili reserves the right to deduct rebates or any other payment due to the Buyer or any amount that the Buyer deducted compulsorily without Nobili's prior written consent.

Clauses of retention of title

Our sales are finalised upon the delivery of the goods; however, the title will be transferred to the Buyer only subsequently to the actual and complete payment of the invoice. Risks are transferred at the time of the delivery and the Buyer must guarantee the goods against any risk, including those of unforeseeable circumstances or force majeure. The Buyer and its insurer forgo in advance any appeal against Nobili. Nobili authorises the resale of the material delivered before the integral payment of the price, without waiving its property right. Therefore, Nobili reserves the right to take back, in case of failed payment of all or part of the price due or that has become due, its own-brand material still in stock at the time of the non fulfilment. The material taken back may be any element in stock coming from Nobili, even if the material taken back was not the one concerned by the failed payment. In the absence of material still in stock at the Buyer, Nobili may look, with any means it deems appropriate, for sub-buyers of its own goods or demand from them the balance from the transfer of the receivable from the main debtor in favour of Nobili, being acquired compulsorily in case of applying this clause. Should Nobili's material be resold together with other goods that do not belong to Nobili, our customer will be considered as having transferred its receivable to Nobili, though only until reaching the amount of the price or part of the price of Nobili's goods not paid for yet. In case of failed payment of all or part of the price upon the agreed expiry, Nobili will be entitled, at its exclusive jurisdiction and subject to simple notification, to exercise its claim right, which will imply the forfeiture of any term allowed, the payment of default interest due automatically from the date of expiry and without the need for any order, calculated at the legal interest rate increased by 50%, as well as the chargeability of all the expenses of any nature incurred to actually recover the goods, with the resale be settled under the conditions below, only in case of non fulfilment of the obligations by the Buyer. Alternatively Nobili may terminate the sale 3 days after sending a registered letter with return receipt notifying the Buyer about the order to pay the price or the balance for the price, interest and expenses as specified above, remained void, or resort to such termination simply for the simple fact that the claim lodged did not result in the fulfilment of the obligations of the Buyer. In all the cases of termination, any pre-payments will be retained by Nobili with regard to both product depreciation and as penalty clause, notwithstanding any other compensation, particularly in relation to amicable initiatives and diligence or that will have been needed for the recovery.

Customer identification data

The customer is responsible for all identification data supplied to Nobili such as, for example: company name, registered office, VAT Reg. number and all the other data requested specifically by current legislation. The customer's data, pursuant to the laws in force in the various countries Nobili exports to, will be retained and processed in order to comply with legal obligations. All the other uses must be accepted by the customer.

Packaging and shipping

Packaging is prepared by highly specialised personnel. Nobili declines any responsibility. Goods travel at the customer's risk and peril. The recipient is expected to check the goods delivered and promptly inform the carrier of any damage at the time of receipt, informing Nobili via recorded delivery (even if this has been chosen by Nobili). Unless otherwise agreed, transport costs will be paid by the customer.

Payment and delays

1. Any delivery subsequent to an order by the Buyer will result in the issue of an invoice. Invoices are payable to Nobili Italia within forty five (45) days from the date of the invoice, via wire transfer, except in case of special conditions agreed between Nobili and the Buyer. All the payments shall be made net of the commissions. In case of payment via cheque, the Buyer shall bear any discount, collection and other banking expense. Payment will be attributed first of all to the costs, then to the interest and finally to the main receivables with the longest term.

2. In case of failed payment upon expiry, by virtue of the articles of the Code of commerce in force in the various countries Nobili exports to, the payment of default interest will be due in full and without notice, calculated on the basis of three (3) percent of the legal interest rate and a minimum of nine (9) percent annually, to the full extent and without recourse, the day after the expiry date stated in the invoice, until the day of full settlement.

3. The failed payment, also partial, at just one of the expiries agreed for any of the deliveries will also imply the forfeiture of the total term of the current expiries.

4. In no case may the payments due to Nobili be suspended or subject to any reduction or offsetting on the exclusive initiative of the Buyer, since Nobili's prior written approval is indispensable, and this regardless of any contrary provision that may be included in the Buyer's purchasing conditions. Any offsetting not authorised by Nobili will be assimilated to a failed payment, which will authorise Nobili to refuse any new product orders as well as suspend the deliveries under way.

5. In case of delayed or failed payment, despite the orders to pay sent, Nobili reserves the right, in relation to any future order, to enforce the payment guarantees as well as ensure that the delivery of the ordered goods only takes place only upon full payment of the order. For the orders to pay remaining without effect, Nobili may request the sale revocation, demand immediate payment for the delivered goods, suspend any delivery and/or cancel any orders under way until all the sums due are settled in full. In case of revocation, the Buyer must refund Nobili all the costs linked to the conclusion of the contract as well as the lost earnings. In case of failed total or partial payment at even just one expiry, Nobili may recover the goods sold, notwithstanding their ownership by virtue of the provisions under the relevant paragraph of these GTS.

Responsibilities

All items forming part of our production are thoroughly tested. Damage caused by an incorrect installation or improper use is not covered by the guarantee, unless otherwise specifically agreed between Nobili and the Buyer. Nobili does not accept returns of goods. However, in case of an authorised return, such return must be on the customer's account. If the material is truly defective, Nobili's liability is limited to replacing the parts, with no compensation due for any direct and indirect damage caused by the use of our products. Customers are forbidden to perform any type of mechanical intervention on our products.

Complaints

Complaints must be sent within eight days from receiving the goods with written confirmation. Any type of return of material must be approved in writing by our marketing management, subject to the presentation of a list of materials with the reason for the return, using the Nobili sheet available on the website www.nobili.it. The return expenses are on the customer's account notwithstanding any specific agreement between Nobili's marketing management and the Buyer. In the case of return of a new and unused product ordered by mistake, the return will be on the customer's account and Nobili will apply a deduction equal to 50% of the value of the product invoiced at the time of the first shipping.

Disputes

The Court of Novara will have exclusive jurisdiction to settle any dispute that may arise.

Guarantee

All products manufactured by Carlo Nobili S.p.A. Rubinetterie are subject to controls at each stage of the production process and are guaranteed for a period of 5 years from the date of purchase, 2 years of European warranty plus 3 years of free extension offered by Nobili (starting from the date of invoice issue). In the absence of an invoice, the installation will be deemed as taking place within a maximum of 4 weeks from the delivery of our products to the Buyer. Coloured and electronic products are guaranteed for 2 years. Spare parts are guaranteed 2 years. The Nobili Widd® 2020, Widd® 35 and Widd® 28 cartridges come with a lifetime guarantee. Standard or sample products ordered under Expo conditions may be subject to shortfall claim exclusively on the condition that the request is received by Nobili within seven (7) calendar days from the date of delivery to the customer and, in any case, subject to validation by our technical service.

The cases listed below are covered by the guarantee:
- Casting, porosity and chrome-plating defects.
- Repair or replacement of products with manufacturing defects acknowledged as such by our technical office.

On the other hand, the guarantee will not be valid in the following cases:
- Errors during installation and application of the product.
- Deterioration of the chromed surface due to the use of cleaning products containing acids or abrasive substances.
- Presence of foreign bodies borne by water (sand, filings).
- Deterioration of the surface presenting finishes other than chrome. The duration of the products is subject to the type of care and gentle use.
- Deterioration of the taps due to incorrect installation.
- Incorrect use of the product.
- Repairs and maintenance performed in an incorrect manner and without the prior authorisation of Nobili.

The Nobili warranty is not renewable.

Cleaning

It is recommended that the tap be constantly rinsed and dried to avoid aesthetically unpleasant limescale deposits. If limescale is found on the surface of the product, it can be dissolved using diluted vinegar (maximum concentration 10% at 20°C) and then rinsed with plenty of clean water. For more information, please consult our website: nobili.it / support / care and maintenance

Commercial organisation

We look after our clients through a qualified sales network that is spread all over the country. We also provide a varied and organised post-sales customer assistance. Trained staff are available to make all your purchase experiences pleasant and simple, and offer special attention to the different needs of individual clients.
